DETAILED ACTION

Allowable Subject Matter

1. Claims 9-11, 15, 18, 19 and 36 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, 12-14, 16, 17, 20, 22-35, and 37-47 rejected under 35 U.S.C. 103(a) as being unpatentable over Ferri et al. (6,262,480) in view of Burns (5,566,051).

Regarding Claims 1-8, 12-14, 16, 17, 20, 22-35, and 37-47, Ferri et al. disclose a package for electronic device having fully insulated dissipator where in Fig. 10, die 11 is attached to the substrate 6 and heatsink 21 is attached to the die. Die 11 and heatsink 21 are both completely encapsulated with encapsulant 31. Ferri et al. fail to disclose the exact distance/thickness between the edge of the molding and the heatsink to be approximately 9 mils thick. However, Burns disclose ultra-high density integrated circuit packages method and apparatus where in claims 4,5,6, 8 and 13, the required thicknesses of approximately 9 mils and less than 9 mils are disclosed.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required thickness between the heatsink and the edge of the molding in Ferri et al. as taught by Burns in order to have a semiconductor device with smaller size.
